In-ground lift retracts level with the garage floor when not in use

In-ground lifts provide extra room and convenience, allowing full use of valuable garage or shop space. Commercial shops can get an extra bay or two by eliminating space needed for the upright posts required for 2 post lifts.

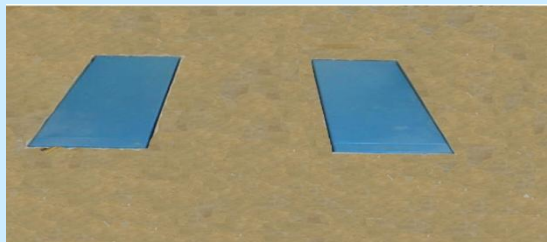

Platform pockets can be formed into new floors or cut in existing floors

EE 6503 height is 70" fully raised, and supports 6,600 lbs

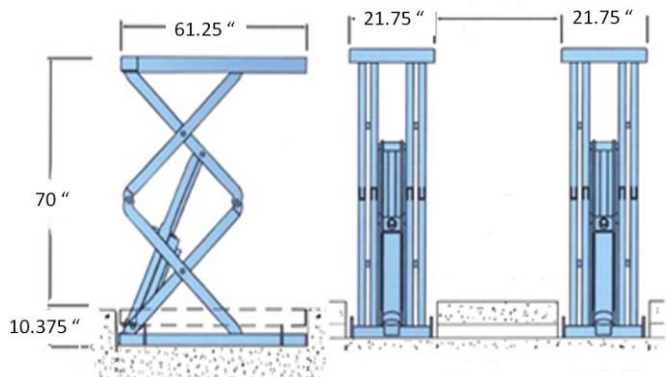

Platforms are 21.75" wide, 61.25 - 76.7 inches long, and 10.375" deep

Shipping weight is 1760 lbs for 2 platforms and control box

240v power, 20 amp circuit

Dimensions are actual lift component dimensions.
Pocket dimensions should be .5" greater on each of 4 sides and depth.
Recommended distance between platforms is 32"

Current Price \$3,199 Plus shipping (call for quote)
